Art Unit: 3723

1. Claims 7-12 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on December 22, 2006.

Applicant elected Group I with traverse. The traversal is on the following grounds:

It is also respectfully submitted that the subject matter of all claims 1-12 is sufficiently related that a thorough search for the subject matter of any one Group of claims would encompass a search for the subject matter of the remaining claims. Thus, it is respectfully submitted that the search and examination of the entire application could be made without serious burden.

This is not found persuasive because the differences between the claimed inventions would require different search strategies requiring a search in additional classes/subclasses not required for the elected invention. This would constitute a serious burden on the examiner.

The requirement is still deemed proper and is therefore made FINAL.

2. Claims 1-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, lines 2-3 and 5, "the approximately cylindrical shape" lacks antecedent basis.

In claim 2, lines 3-4, "the tip end" lacks antecedent basis. Lines 5-6, "...fluid pressure to act on the piston to move it toward the tip end..." is not understood in view

Art Unit: 3723

of the specification and drawings and in view of the lack of antecedent basis for "the tip end".

In claim 3, line 3, "the rotation center" lacks antecedent basis.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1, 2, 4 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Folta (5257561).

Folta discloses fastening means (at least elements 36, 102) and an expanding means (at least elements 56, 68), see figures 3 and 4.

5. Claims 1, 2 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Vanderzee (4023407).

Vanderzee discloses fastening means (at least elements 99, 105) and an expanding means (at least elements 48, 92), see figures 2 and 3.

6. Claims 3 and 5 may be given favorable consideration if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

7. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

Art Unit: 3723

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

8. Claims 1, 4 and 6 are provisionally rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-2 of copending Application No. 10/504,574. This is a provisional double patenting rejection since the conflicting claims have not in fact been patented.
